

## TCPI Exemplary Practice Performance Summary, August 2019 Gilbert Children's Medical Group, dba Gilbert Pediatrics

**Gilbert Pediatrics** has over thirty years of serving children and their parents in the Southeast Valley in Arizona. Their group of compassionate, skilled pediatricians and pediatric nurse practitioners provide comprehensive medical care for infants, children and adolescents in a fun and caring environment. They specialize in pediatrics because they love viewing each new baby as a potentially happy, health adult and doing everything they can to help parents achieve that goal.

Gilbert Pediatrics makes each office visit a learning experience. They take the time to listen to parents' and patients' concerns and needs; then they love to teach principles that will empower them to make great decisions to promote optimal health, wellness and happiness in their family. Gilbert Pediatrics is committed to communicating not only their recommendations, but the reasons so patients and families can be true partners in the child's health, well-being and developmental progress.

Gilbert Pediatrics joined the Practice Innovation Institute (Pii) in 2016 and graduated in February 2019 by completing the 5 Phases of Transformation and joining a qualified Alternative Payment Model (APM). As a result of their work, they have been certified to have meet Pii's definition of an Exemplary Practice.

A **Pii Exemplary Practice** is one that meets the following criteria:

- ✓ Practice has met Phase 3 and/or above
- ✓ Practice has implemented one of the six PFE metrics
- ✓ Practice is contributing positively in on one or more of the TCPI service delivery Aims.

With the effort of organizations such as Gilbert Pediatrics, Pii was able to meet or exceed program commitments. As of the end of Q15 Pii achieved/exceeded established commitments for AIMS 2 – 5.
